**Farm Manager Wanted:**

Must be honest, self-motivated, organized, neat and hard working. We need someone who can recognize what needs to be done and make sure it is done. The cows generate your salary. If the cows are not taken care of, then they can't pay you. Leadership characteristics are required for growth. We can't hire more help if you can't manage them.

Job requires some weekend and night work. Most days will not but when calving 120 cows, getting cattle bred or rain is coming and we have to finish, it may happen. Not to mention cows eat every day. Most work will be done solo. Additional help will be available when needed. Owners are present on farm daily.

Extensive AI and ET program, so related experience is needed. We can send you to AI school, but you need to know how to run the process and be efficient at checking heat.

Must have experience handling cattle, fixing fence, minor equipment repairs, running equipment and hauling trailers. Our Hereford cattle are calm and we expect them to be worked that way.

Must be familiar with show cattle and good with children. We are not making parade animals but my kids will need help with 4-H projects. The kids are hard workers.

Livestock judging experience is preferred but not required.

On site housing is included.

Good personality and a sense of humor is required.

Send resume and expected rate of pay to [info@innisfailfarm.com](mailto:info@innisfailfarm.com)

Emails only. No phone calls.
