

TF

Mead

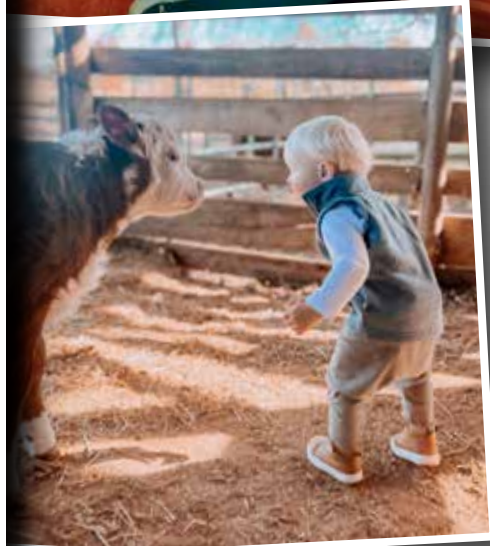

Hard to believe that it's been 46 years since I registered my first calf. I am very thankful and blessed to be afforded a lifestyle involved in this industry and breed. I have witnessed many changes and improvements in the cattle and the business.

Technology has changed the way we collect data and prove the merit of our product.

However, at Mead Cattle, "What really matters hasn't changed". We still focus on producing bulls and females that survive and thrive in the environment in which they are subjected. Mead Cattle will always continue to provide sound, good doing, problem free Hereford and Red Angus genetics to purebred and commercial producers.

A heartfelt THANK YOU to all the friends and customers that have invested in THE MEAD PROGRAM. It is truly a blessing to work in the livestock industry and live on the land that God created.

HOPE TO SEE YOU IN MIDVILLE MAY 27TH

SCHEDULE OF EVENTS

FRIDAY, MAY 26

Viewing Cattle All Day

Join us for Dinner at 7:00 p.m.

SATURDAY, MAY 27

Sale starts at 11:00 a.m. EDT

Lunch immediately following sale

MONDAY, MAY 29

White Hawk Ranch Female Sale

Buchanan, GA

ONLINE BIDDING

If you are unable to attend the May 27th sale, you can log on to www.LiveAuctions.tv to follow the progress of the auction with live audio and video. Real-time live bidding for this sale can be done via the internet through LiveAuctions.tv. Live audio and live video will allow buyers to bid on animals as if they were present at the sale.

To bid, buyers must create an account and request a buyer number, preferably prior to sale day, at www.LiveAuctions.tv. Instructions are available there to walk you through the account setup process.

Contact the LiveAuctions staff prior to, or during the sale at 817-725-8595, with any questions.

Sale Day: Katie Colyer, 208-599-2962

THM Z426 Vista 6132 — Donor Dam of Lot 3B

THM U38 Visionary 4103 ET — Grandam of Lot 3B

- Lots 2A and 3A show what the sire can do.
- Donor 6132 is one of our all-time best Excede daughters and the reason we flush her regularly.
- Grandam 4103 has to rank in the top ten all time donors at Mead Cattle. Her dam and grandam were equally as good.
- Another valuable opportunity with this 3-in-1 package ... you get the heifer calf, the recip and the pregnancy.
- 9-year-old Red Angus Recip.

Lot 4 — THM H086 Elsa 3124 ET

Houston ... WE HAVE LIFT OFF

- Our first calves by Houston have been exciting and this young lady shows you why.
- She has all the "look" we like along with the necessary performance demanded to succeed in this program.
- Elsa will be one of Dahlia's superstars when she matures.

Lot 7 — THM 79G Delilah 2046 ET

- These will be some of the first daughters in production and we anxiously await their calving time.
- We co-own Authorize with W&A Hereford Farm in North Carolina where he is working equally as well.
- Authorize is a maternal brother to the \$130,000 herd sire NJB Character 178J owned by 4B Farms in North Carolina.
- This lady is conservatively marked, long and broody.
- AI serviced on 1/21/23 to KCF Bennett Monument J338, then pasture exposed from 2/4/23 to 3/25/23 to THM Ogeechee 2018 ET. Safe in calf.

- One of the really super sweet cow prospects offered.
- The Houston calves around the country are creating quite a buzz and we couldn't agree more.
- Three very influential cows on the dam side of this pedigree ... 1234, 8088 and 5183.
- Juniors and cowmen take note here.

- Homozygous Polled.
- Dam is one of the most influential cow families in the Mead Program.
- His sire "Cowboss" is the tried and proven herd sire for Durbin Creek Ranch in Wyoming. His sons are consistently the top sellers in their annual bull sale where over 100 bulls are offered each February.
- Cowboss daughters are donor dams for several well-known purebred operations.
- This lad is dark red, long bodied and loaded with actual performance.
- Maternal brother is a herd sire for Taylor Neighbors and Cody Cleveland.
- BW 70 lbs.

- Selling ¾ interest and full possession.
- Homozygous Polled.
- Dark cherry red, deep and soggy.
- Masculine and looks like a herd sire.
- The Masterplan cattle across the country are high quality, popular in the marketplace and productive looking.
- Stems from the Trask cow family "4263" that bred so well for us and Tennessee River Music.
- THM Victra Dom 152 5043 was as good of a brood cow as we have ever owned and the dam of multiple herd sires.
- His dam "7019" is a model "Grass Cow" that will work and function in any environment.
- Maternal brother to herd sire THM Ogeechee 2018 ET.
- BW 76 lbs.

- A cow, cow, cow prospect that reminds us very much of her great grandam Victoria Belle 1817.
- She is low maintenance, big bodied and correct.
- Study her udder development and dream of the day she calves.
- This pedigree, EPD profile and quality all in one package should make this an interesting pick on sale day.

Lot 16 — THM 183F Beth 3014 ET

TH Masterplan 183F — Sire of Lots 13, 14, 15 and 16

- The flashy sister. More pigment and conservatively marked.
- Only calving them both out will tell us who works harder but our thinking is both will be potential front pasture donor prospects.
- All 3 flush mates, Lots 14, 15 & 16, offer a super spread from birth to yearling, high maternal traits and a positive carcass contribution.

Lot 17A — THM Sheridan 3197

THM Hewlett 0176 ET — Featured Sire

- Another very attractive Hewlett daughter that will have friends on sale day.
- She is the complete package and would make a super junior prospect.

Lot 26 — THM 53D Victoria 9082 ET

SHF Houston D287 H086 — AI Service Sire for Lot 26

- The old saying "proof is in the pudding" ... well, this cow's pudding is pretty rich!
- Load up on these 3 sisters and you will have a powerful breeding set of females.
- AI serviced on 12/31/22 to SHF Houston D287 H086, then pasture exposed from 1/10/23 to 2/20/23 to THM Blanton 1009 ET. Safe in calf to the AI service.

Lot 27A — THM 318G Victoria 3093

- We sampled "Chief" on a couple flushes and a few cows to add his weaning and yearling performance along with his marbling traits.
- We are very pleased with the results and understand why W&A Hereford Farm and White Hawk Ranch use him so heavily.
- This girl should be a valuable addition to anyone's program.

Whitehawk Chief 318G ET — Sire of Lots 25A, 27A and 33A

Lot 51 — THM 66589 HannahMay 2126 ET

- Maternal sister to Lot 2B.
- Her dam 8088 is one of our best.
- The only Mandate daughter we are offering this year and she will be in the very top of these bred yearlings.
- AI serviced on 2/15/23 to KCF Bennett Monument J338, then pasture exposed from 4/1/23 to 5/25/23 to THM Notttely 2186 ET. Safe in calf to AI service.

- The yearling we have selected to breed heifers.
- We wanted to use a Masterplan son and this guy is out of one of the all-time strongest THM cow families.
- His EPD profile advances the numbers and his conformation fits the type of cattle we like to breed and feed.
- We are excited about his contribution to our program.

- Tommy Coley told us about this young sire and after seeing his photo, pedigree and EPDs we elected to use him on this set of heifers.
- His birth to yearling spread is incredible, his milk number is insane, his carcass numbers are what we all need and his \$ indexes are off the chart.
- He is dark red, pigmented and marked just right.
- His phenotype is ideal for use on heifers and his pedigree is marketable.
- We are excited about what he offers the breed.

- Service sire on a few of the bred yearlings.
- Our selection from the Cowboss flushes to keep and use at THM.
- We like this genetic combination of Ladysport 78P, Ribeye 88X and our old faithful donors 5043 and 4263.

Thank you for taking the time to look through our offering this year. This set of cattle is high quality from top to bottom and offers a little bit of everything. These cattle are all from our program and carry the IF brand. Every mating was planned to produce a bull or female that we would expect to be functional and profitable as well as contribute to our genetic progress, not to make trendy cattle for trade.

The fall of 2017 produced three elite donor families, 7111, 723E and 720E. These females have proven themselves with their progeny in our herd and we wanted to share these breed leading genetics with you in this sale. All cattle will have GE-EPDs posted by sale time.

While we always believe in the need to use data as a selection pressure on our herd, we also recognize the importance of visual appraisal and its contribution to longevity and ultimately profitability. With that said, we feel this is the most uniform, highest quality, highest performing, best looking set we have offered. We would love to show them to you in person or answer any questions you may have. Thank you for your interest and we look forward to seeing you again this year.

Take time to look through the TOP 5 LISTS we have printed this year. You will find we have highlighted six traits we feel are very important to our operation and help our customers become more profitable.

CED — First they have to get here. We don't like to only look at birth weight because it doesn't properly account for body shape and gestation.

WW — We like to maximize ww because a large portion of our customers are selling at weaning. We also don't want to chase huge mature weights and feel it is important for the cattle to have a growth curve that reaches mature weight quickly and then rapidly tapers off without having huge frame scores. Think dense cattle.

UDDER/TEATS — Milk flow is important and as we push these cattle to milk more we need the package to hold up and be problem free.

MARB — We want to produce the highest marbling cattle possible to capture the maximum amount of premiums available.

BMI — This index helps keep our herd maternally focused while supplementing the profitability of our commercial customers

CHB — This index helps keep our herd oriented toward feed yard profitability which is the ultimate end game for all beef cattle.

- Every year, we search the ranch for an animal that is the epitome of our breeding philosophy to start our chapter of the sale book with. 7111 displays next level functionality and eye appeal with tremendous in-herd ratios and EPDs. She has perfect feet and tremendous body shape coupled with sensible mature stature and genuine skeletal width. 7111 is a 3rd generation donor here on Innisfail Lane and her first daughter by Z311 joined her in the flush lot this fall!
- Bringing in 3 BW@100.3, 2 WW@102, 3 YW@101.3, 7 REA@111, and 7 IMF@112.9- 7111 has proven she can get it done and has a sweet litter of C615 daughters in the bred heifer pen.
- She is backed by a true generator, much like herself, on the bottom side in 4021. 4021 is the full sister to 4013 that raised our popular pen of Endure sons at the 2020 NWSS. Folding in 73S on the topside, 7111 combines what we believe to be two of the better cow families in the breed while remaining ultra progressive in her data.
- MDF.
- Pasture exposed from 1/10/2023-2/20/2023 to Innisfail T723 B413 1943 ET. Safe in calf.

Lot 54 — Innisfail C615 7111 2134

- Homozygous Polled.
- I always thought that if 2134 stuck around here she would eventually make her way into the donor pen. We decided to pick her out as a feature bred heifer and to offer proof of what 7111 can do. I said it last year and I will say it again in 2023 — gather these C615 daughters up. I know he isn't the new sexy bull of the day, but his oldest daughters are now 6 and they are extremely impressive. The guess work that comes with purchasing a bred heifer is eliminated when their genetics have this level of accuracy and proof in production!
- 2134 is moderate, dense, and great structured — she just looks like the kind that it's easy to sell bulls out of. When you check out her dollar indexes, it is easy to see she will generate cattle that are driven for profitability in all segments of the beef cattle industry!
- Ratios of 124 for REA and 105 for IMF.
- AI service on 11/22/2022 to Innisfail Trademark 1939 ET, then pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail Trade Secret 14J. Safe in calf.

Lot 55 — Innisfail 21G 7111 2228

- Polled status pending.
- 2228 has one of my favorite pedigrees in this year's sale offering. We talked about all the phenomenal cow families that 7111 wraps up — add in a shot of 45C to the top side of 2228's pedigree and things get real good and real consistent. I have been a huge fan of the Prominent cattle, they just seem right for the times: sound, moderate, good looking, and balanced across all economically relevant traits. Our commercial bull clientele sure seemed to agree with that this winter.
- This 7111 daughter is built as good as they come. She is big footed and so relaxed in her angles off either end. As a result of her flawless build at the group, 2228 is ideal in terms of how she collects herself in her lines and balance.
- These ET calves were weaned at the co-op and picked up 7 days prior to picture day. Being familiar with her pedigree, I bet this one blooms up like crazy in her body shape between picture time and sale day.
- GE-EPDs will be available prior to sale day.

Lot 56 — Innisfail 4013 723E

RIGHT TO FLUSH

- I promise that 723E was indeed the 23rd heifer calf born in 2017, it just so happens she is the cow we have chosen to take her grandmother (both on the top and bottom side) T723's, place in our ET program. Yes, that does indeed make paperwork as difficult as you might think.
- 723E has as beautiful of a fore-udder attachment as I have ever seen on a Hereford cow. She is monster bodied, great footed, and is the biological type that thrives on fescue. I am a firm believer that any chance we can get to bring 028X into the program in a polled package we must capitalize on it. She is a direct daughter of "the horned cow" that has become a must see of all visitors. 723E's sons by CEO were popular with commercial producers at The Source and in our private treaty pen.
- She records 4 BW@95.5, 3 WW@102, and 7 IMF@112.6.
- Cow will remain open for us to flush through next fall and conveniently located at Dogwood Genetics.

Lot 56A — Innisfail Align 30K

- Polled status pending.
- By the time the dust settled in OKC, the most common question I received was, "Are you selling any Kings this spring?" Honestly, the bulk of the cows that are raising E33 calves are over the "hump" of being appropriate sale age. We figured we better come up with a pretty special calf to represent the great job he did on Innisfail Lane last winter.
- 30K is my personal favorite calf out of the E33 sire group. He is long bodied, bold and opened up, and undeniable in his eye appeal. It is hard to make cattle that read with this kind of CED so stout featured and big hiped. He still looks like a true calving ease sire in the shape to his skull and how he is assembled in his shoulder blade.
- Perhaps my favorite thing about "Align" is he is double bred 028X and double bred T723. If you are looking for a bull to bring in elite cow families in the Hereford breed and do it in a consistent manner, then you may have just stumbled upon him.

Lot 57 — Innisfail 237C 933G

- Homozygous Polled.
- Perhaps the only cow on the place better uddered than her mother, is 933. I love this cow — moderate, soft ribbed, and ultra sharp in her feature. This cow family has an intriguing relationship between CW and MCW — a growth curve suitable for our geographic region that still keeps us industry relevant on the rail! Her sire, 237C, did us a great job and left us with a set of hard working daughters with extra “look.”
- In complete transparency, I am not ready to sell this cow — seeing as this is her first heifer calf. We have committed to highlighting these new cow families this year and want to offer you the very best out of them.
- Pasture exposed from 12/1/2022 to 2/1/2023 to Innisfail T723 B414 1943 ET. Observed bred 12/3/2022. Checked safe in calf to observed date. That’s 30 days post calving, got to love a cow that can get that done!

Lot 57A — Innisfail Function 236K

- Homozygous Polled.
- There is a whole lot of Function service selling in this catalog, whether it be AI on heifers or natural on cows. If you want to know what the progeny look like — study 236. She is essentially a cookie cutter of every 0244 on the farm. He is tremendously consistent, and we sure think they are tremendously good.
- 236K is moderate, dense, and sets the standard for basic build. Just like her sire, she offers extra pigment, bold body shape, and added proportionality. She is built for the long haul!

Innisfail Z311 723 720E — Dam of Lots 58, 59 and 60

- These footnotes need to be all about transparency, and I believe as much time and effort as we put into these critters they deserve to have their story told. So, here is 930's story. Last year, I set up every MDC cow on the place to put an egg in them. 930 had a great heat and I couldn't pull the trigger, she was just too darn good. I sorted her off and stuck a straw of Harvest in her that night. If you see her sale day and think you would have done the same, then here is your opportunity.
- We are so passionate about making these cattle fit our environment, and 930 does it to a "T." She is sensibly sized, has that soft body shape we all love, and still opens up with tremendous upper rib shape. She offers added strength through her sternum and pin set.
- She was the first natural calf out of our 720E donor and was a major part of our decision to flush her as a 2-year-old.
- Her first calf by 1943 ratioed 117 on IMF and was the second bull we sold this fall — she's bred up the same way again!
- Pasture exposed from 12/1/2022 to 2/1/2023 to Innisfail T723 B414 1943 ET. Observed bred 12/6/2022. Checked safe in calf to observed date.
- MDC.

						199	1%		

- I think this Harvest sire group is exactly what we were after when we sampled him. They are consistently a really good kind, and his BW and CED figures are no joke. 206 is the most eye appealing, balanced Harvest calf we have.
- She may be a nickel moderate for some, but if she is your kind, then she is exceptionally high quality. I love 206's density — she's opened up in her chest floor, extra bold in her body shape, and big hiped. With all this power, 206 still maintains extra balance and presence.
- It is extra difficult to find cattle with these kinds of figures, it is even harder to find them that don't have any Validated in their pedigree. Finally, when they look like this, I believe it just adds value to an animal that's already difficult to make.
- MDC.

SHF Harvest D287 H033 ET — Sire of Lot 58A

Lot 59 — Innisfail Mandate 720E 2111

- Good kind of stock here in this Mandate daughter that offers an impressive spread from birth to yearling. She is undoubtedly the deepest bodied bred heifer in our offering. From there forward, she is chiseled perfectly in her head shape and how her neck comes out of the topside of her shoulder blade.
- There can always be some guess work associated with investing in a bred heifer, but if you flip the page back to the left — you will get a pretty good handle of what 2111 will look like as a 3-year-old.
- Ratios of 105 on REA and 111 on IMF.
- When you sort the AHA data base, Lot 59 is the second highest marbling Mandate daughter in the breed.
- AI serviced on 11/22/2022 to Pyramid Function 0244 ET, then pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail Trade Secret 14J. Safe AI.

Lot 60 — Innisfail Mandate 720E 2117

- Here is a dang nice goggle-eyed daughter of highlight donor 720E. When 2117 turns and leaves you she packs extra punch. She has added strength out of the backside of her shoulder, is ultra-shapely out of her hip and stifle, and still looks like a lady from the side.
- The fall of 2017 blessed us with 3 standout females: 7111, 723E, and 720E — all of which have been highlighted within the first 7 pages of our chapter of the catalog. Here is a great opportunity to own a high-quality daughter of one of them! If you are trying to build a maternally driven cowherd, these females carrying Function pregnancies are a great place to invest.
- Dehorned.
- AI serviced on 11/22/2022 to Pyramid Function 0244 ET, then pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail Trade Secret 14J. Safe AI.

- Homozygous Polled.
- Here she is folks! A full sister to Trademark and 1943. If you are on the hunt for big time carcass figures, here they are. 1917 is the most elite animal in the sale when it comes to marbling and CHB index. To top it off, she is the only direct daughter of T723 that we are offering in 2023.
- She is the stoutest, squarest footed, biggest ribbed, most massive daughter of Validated that I have seen to date. 1917 has great udder suspension and ideally placed teats. She has had a tremendous track record of fertility, never missing the first AI service.
- We invested in some Broadway semen to flush with and I may have slipped some into a few Validated and 4013 daughters when we were AI'ing cows this fall. Luckily for you she was in that cut! We think the data he put up in the NRSP matches up perfectly with our goals and objectives. If you share that same vision of creating efficient cattle, with added value on the rail, that you still get excited to go look at — go ahead and mark this one down!
- AI service on 11/29/2022 to Churchill Broadway 858F, then pasture exposed from 12/5/2022 to 2/1/2023 to Pyramid Function 0244. Safe AI.

- Homozygous Polled.
- In the ever changing seed stock realm it is easy to grab the coat tails of what is cool and trendy. We do our best to create an animal that represents Innisfail's goals for the past 4 decades: basic functionality coupled with top tier carcass value. That being said, we can all still recognize when it is time to bring in an outcross animal to balance the pendulum. Hence a decision to bring Function to Madison, GA. He is the perfect complement to these 4013 and Validated cattle. 0244 is going to keep mature stature in check and push the needle further for functional longevity. 204K represents an opportunity to buy into our long game.
- Lot 61A is moderate, good structured cattle that still excels in the traits that our commercial clientele deem most important. She may have a floppy ear, but I promise it was operator error (myself) on the tagger the day she was born.

- Homozygous Polled.
- If there is any cow family at the ranch that I get really clingy to, it's the 1580s. She was brought in from our good friend Bob Nelligan, at Stonegate Farm, as an outcross donor option. Shortly after coming to Innisfail, 1580 laid down and had a sweet 100W heifer calf. That heifer calf turned out to be Homozygous Polled and proved to be a true generator — raising a bull we used on heifers on her first try and our lead off pen heifer, and high selling bred in OKC, on her second.
- We got to looking at the list of sale cattle this year and realized there were no Trademarks, another thing I seem to cling onto. Here is a great opportunity to own what we believe to be the best son of 1939 we have made to date!
- 2255 is incredibly wide backed and thick ended. He offers tremendous length of spine and athleticism. With all the bells and whistles tacked on: in terms of being short marked, cherry red, and goggle eyed, we think Tradewind holds unlimited upside potential.
- Dam records 2 BW@97.5 and 2 WW@106.
- Unfortunately, we didn't get these ET calves in from the co-op in time to get GE-EPDS back on them to print with the catalog. We will do our best to share them with you as soon as they are in!

- I never thought that we would take an animal out of a first calf heifer, straight from the program to the national show in the middle of the spotlight. We did it with 130 and it was a success! She was the anchor female in our popular 2023 Cattleman's Congress Champion Pen of Senior Heifer Calves.
- 130 is tremendously long bodied, balanced, and proportional. She weaned off at a ridiculously high percentage of her mother's weight. Although it may have not been advantageous to her being in the show ring, her hair coat is as perfect as I have ever seen for our geographic region. She has been a true standout from the day she was born. 130 posted a 132 weaning weight ratio!
- Cattle like her were a main driving force behind our decision to lease back fall possession on 1943 this year. If you have interest in any of the cattle selling with service to 1943, then 130 would be a great animal to look up sale day as a point of reference to his generating potential.
- Pasture exposed from 2/21/2023 to 4/10/2023 to Innisfail Trade Secret 14J. Safe in calf.

Lot 64 — Innisfail Queen 1912 2237 ET

Innisfail T723 BH3 1912 — Dam of Lot 64

- Polled status pending.
- We first laid eyes on Fresh Prince in OKC just as we were watching a set of two-year-old Belle Air daughters become tremendous mothers. We decided he was a must use polled option to bring in Belle Air's density, moderation, and marbling. As an added bonus, he brings in some great maternal lineage.
- 2237 is backed by a high performing, huge bodied, square built full sister to Trademark. In her own right, she's a great balanced, soft ribbed one with a solid running gear! We don't typically offer ET heifer calves straight from the heart of our replacement pen, here is a great opportunity!

Lot 65 — Innisfail 1837 004H 101K

Innisfail 839E 907E 004H ET — Dam of Lot 65

- Homozygous Polled.
- If you don't like Big Red, then ... you know the rest. I'm just kidding, if you thought she was a nickel on the plain side we can still be friends. However, there was no denying her functional build, genuine width underneath, and added body and mass. 101K, herself, is great at the ground, big bodied, and extra functional in her kind.
- This sale is dedicated to offering you the opportunity to get on board with the most exciting young cow families on the ranch — here is your opportunity to get in on the ground floor of 004!
- Sells open and ready to breed to the bull of your choice.

- Homozygous Polled.
- A daughter of our high selling donor in last year's sale, 871E. This flush to Validated resulted in exactly what we had in mind when 871E was purchased from the Jensen program as an open heifer calf. In addition, 2121 is also a full sister to the female that Boyd Meyer selected as choice of our 2021 ET calf crop sold in the National Sale the first year in OKC.
- In her own right, 2121 is moderate, big ribbed, and really good looking. She ranks in the upper echelon of the breed in terms of marbling and CHB.
- Pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail Sandman 1580 2156, then exposed 2/2/2023 to 3/1/2023 to Innisfail Trade Secret 14J. Safe in calf.

- The first time we have ever offered up embryos in this sale! To be honest, we always just felt like the timing was off for frozen demand. With that being said, we think this mating is as good as we have made, regardless of the calendar.
- Endorse, a maternal brother to our feature Lot 53 donor, posted some incredible data in the NRSP. Now that we have calved his first set of daughters, he has earned a long standing place in our AI sire lineup.
- 2158 was Boyd Meyer's selection as the choice of our 2021 ET calf crop. While he was aspirating her this winter, we decided to grab one of our flushes. She produced a quantity of embryos large enough for us to justify sharing some!
- Guaranteeing one (1) pregnancy if implanted by a certified embryologist.

Innisfail Valid 871E 2158 — Dam of Lot 67

Lot 68A — Innisfail 4013 210K

Lot 68 — Innisfail Excede 917G

- Homozygous Polled.
- These 4013 daughters just never go out of style. Their general practicality coupled with aggressive performance has made him a mainstay in the Hereford breed. 210 does all that with added eye appeal. She paints a flawless silhouette, is extra smooth shouldered, long bodied, and long hiped.
- We are not offering any full blown "show heifers" in this year's offering, but I think this one could run with the best of them. She was a favorite of a few folks, that I consider to be some of the better show cattle talents in the Southeast, at the State Livestock Judging Contest. We would like to note that, just like every year, every calf sells broke to tie.

- Homozygous Polled.
- The hard-working kind! I'll be the first to admit, you won't walk up to this one on sale day and label her as a standout. However, I bet you won't overlook her heifer calf. These kind of cows generally prove to offer a great deal of return on investment. She is also bred up AI for the third time in a row! Dam of Distinction in the making.
- Her first bull calf, by 1943, was popular in our private treaty pen and is now hard at work for Charles Woodward.
- She brings in 1 WW@114, 1 YW@102, 1 REA@105 and 1 IMF@108.
- AI service on 11/22/2022 to Innisfail Trademark 1939 ET, then pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail T723 B414 1943 ET. Safe AI.

Innisfail X651/723 4013 ET

"4013"
Sire of Lots 68 to 72

Lot 69 — Innisfail 4013 916G

Innisfail 723 York 5000 ET — Dam of Lot 69

- We should never be selling this one, due in large part to her beast of a mother that's now in the donor pen at Harrison's in CA. When the decision was made to not offer any 2 year olds, we sorted a handful of impressive '19 model cows right out of the top of the "T723 influence pasture." 916 just so happens to have two shots of T723 front and center in her pedigree.
- She is the right size, bold bodied and has an udder that will last forever. 916 has a unique combination of an ultra high CED number and progressive growth figures.
- Pasture exposed from 12/5/2022 to 2/1/2023 to Pyramid Function 0244, then pasture exposed from 2/2/2023 to 3/1/2023 to Innisfail Trade Secret 14J. Safe in calf.

Lot 69A — Innisfail Function 232K

- Homozygous Polled.
- These Function heifer calves will prove to be wise investments, especially when they are backed with the consistency of cows stacked on the bottom side of 232's pedigree.
- 232 is hard to walk by and easy to look at. She's extra elegant in the way she's sculpted in her head and neck, perfect in her body shape, and square hiped. Her flawless structure and build allows her to maintain a high level of presence.
- I think her ability to combine relevant growth and carcass weight EPDs with moderate mature cow weight is very interesting. This growth curve leads to cattle that wean at a high percentage of their mother's mature weight. As we look toward increasing efficiency, I believe this is an exciting concept to highlight.

- Homozygous Polled.
- 871E was a highlight in last year's edition of this sale, selling to Jason Day and Andy Smith. If you like what you see on these 2 pages, then I would highly suggest tuning into their programs in the coming years. 871E always had a knack for injecting tremendous mass, substance, and look. Her eggs are sticky and, in the spirit of staying true to offering the pinnacle of our program, we have decided to share 3 heifers out of her final calf crop at Innisfail with you!
- I think it will be really fun to watch who gravitates to each of these, as the differences are fun to discuss! There were five 4013 x 871E females born this fall. When we went to pick out a few sale cattle, at the co-op herd in January, we decided we wanted to find the best looking one, the most massive one, and one that simply does everything right. When they were weaned these 3 were just that!
- These are full sibs to 2047 "Buford," the bull we had on display at the 2022 Cattleman's Congress that sold to Lorenzen Farms and Keaton Dobbs. We have a handful of calves out of him that are standouts!
- As previously stated, these ET calves didn't get home in time to have GE-EPDs printed in the catalog, they will be available prior to sale day. It will be interesting to see what the computer does with this trio!

- Homozygous Polled.
- 913 is a performance driven 4013 daughter that can flat raise one. She's big bodied and functional in her build. Her dam, 4001, was a Durango x 209. When I first arrived at Innisfail there was a litter of those cows here and they were incredibly hard workers.
- Her calf last year posted ratios of 111 at weaning and 107 at yearling.
- AI serviced on 11/29/2022 to TH Masterplan 183F, then pasture exposed from 12/5/2022 to 2/1/2023 to Pyramid Function 0244. Safe AI.

- Homozygous Polled.
- Here is your first chance to own a son of Function 0244. You have heard it this whole catalog, but I'll say it again, we are really high on this bull. 33K looks just like him.
- He is a big footed, rugged built bull calf that is functional in his build. 33K is soft middled and offers tremendous muscle and shape. To top it off — check out that pigment!

- Homozygous Polled.
- If you like your cattle with some added size and stature, then these 2 pages are for you! 008 is a big, stout, powerhouse.
- She gets it honestly, check out the bottom side of her pedigree. Her mother was a Who Maker x Diana that was a 2-time Champion Hereford at the Georgia National for Dru!
- AI serviced on 11/29/2022 to TH Masterplan 183F, then pasture exposed from 12/5/2022 to 2/1/2023 to Pyramid Function 0244. Safe in calf.

- Homozygous Polled.
- I think these females out of 84F will be a hot commodity in the future. The purchase of 207 would put you in the driver's seat with a young daughter of the now deceased sire.
- 207 is ultra feminine in her front one third, long bodied, and big hiped. She sports some pretty progressive growth figures!

- Homozygous Polled.
- We have been on a pursuit to find the right C615 daughter to flush for quite some time now. The truth is, they were all just so dang consistent that finding an outlier within the population was difficult. It was when we calved 824's first daughter, by 4013, that we knew she was the one. This cow just quietly goes about her business, raises a top end calf, always settles AI, and calves 365 days post calving. She's tidy uddered, square footed, sensibly sized, and offers progressive carcass data. As far as I am concerned, she's the kind we need to mass replicate.
- For my fellow Bonsma enthusiasts, 824 fits the bill — wedge shaped, ultra lady like in her front end assembly and head shape, and she's got the chest pleats!
- Her 2022 bull by Trademark, Trade Secret 14J, was utilized on heifers here this year. 824's influence will be seen here for years to come!
- 2 REA@103.5, 2 IMF@125.5.
- Sells open and ready to flush!

- Polled status pending.
- When the data came in from the Mershon NRSP this January, we fell in love with Endorse 1838 all over again. We were already well aware of his ability to inject marbling, pigment, and performance in an attractive, functional package. The efficiency data he posted just solidified our opinion that he is a bull that is driven for profitability in the beef cattle industry. He will see heavier use than ever before this fall at Innisfail.
- Here is an opportunity to own a bull out of 1838 and a cow that has proven herself to be a true generator. 27K is a rugged, long bodied bull calf that is aggressive in his muscle shape. He is big, square hipped and has great pigment.
- Check out his dollar indexes, here is a genetic opportunity to really move the needle in a positive direction.

- When we were taking some early wet cow pictures this fall, 938 walked into the picture pen and in 10 seconds both my brother and John Reasor asked, "What are you flushing this one to?" Honestly, if two people that I respect that much were saying it, then I dang sure should have flushed her.
- 938 is high growth cattle on paper and she sure matches up. When you study her coming and going she offers tremendous skeletal width. Unlike many cattle with this much power, she doesn't sacrifice a lady-like look from the side. 938 is exceptional in terms of her basic build and structure.
- Individually, she posted ratios of 112 at weaning and 114 at yearling. At scanning time she ratioed 57 on fat and 103 on IMF, a very interesting combination of two inversely correlated traits.
- MDF.
- AI serviced on 11/29/2022 to TH Masterplan 183F, then pasture exposed from 12/5/2022 to 2/1/2023 to Pyramid Function 0244. Safe AI.

- Homozygous Polled.
- At the time I am writing this, 213 is leading the pack for growth and performance. She is very long bodied, bold ribbed, and feminine in her front end assembly. 213 has been a favorite of visitors early this spring due to her ability to combine power and shape with an undeniable eye appeal and presence. She looks eerily similar to her mother when she was at this stage in maturity. If you are on the hunt for added performance without sacrificing balance, make sure that this one is on your short list!

Lot 74A — Innisfail Houston 213K

Lot 75 — Innisfail Contend 8170 2133 ET

PCC New Mexico Lady 8170 — Dam of Lot 75

- Every year I get a few phone calls from people asking what bred cattle in the offering can generate show cattle. We dug in deep here and came up with two bred heifers we feel can do so at a high level.
- Every person that visits the ranch, from the show cattle realm, is always in awe of this one's mama, 8170. She is one wide, good lookin' unit.
- 2133 is incredibly bold bodied and stout hipped. She is ideal in her underline proportionality and how she transitions out of the backside of her shoulder blade. Most importantly, she's so relaxed in her angles, gets around effortlessly, and does it on some big pipes.

- Dehorned.
- Pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail Sandman 1580 2156. Safe in calf.

Lot 76 — Innisfail RYC 110J

JR 955 ET — Dam of Lot 76

- I'll be the first to admit, I probably try to make mating these show cattle way harder than it needs to be. At the end of the day, it's like anything else — stack in cows that excel at the traits you want, and you will get what you select for. 110 combines two of my favorite horned cows, Kylie 2137 on the topside and JR 955 ET (Sally) right on the bottom. Her mama was fortunate enough to win her division at OKC in 2021 and go on to be named the Southeast Horned Show Heifer of the Year.
- 110 is incredibly square built and offers genuine skeletal width coupled with an ideal silhouette. I think you mate this one up to a bull with some big, hairy legs and the results could be major league!

- AI serviced on 11/20/2022 to Pyramid Function 0244, then pasture exposed from 12/5/2022 to 2/1/2023 to Innisfail Sandman 1580 2156. Safe AI.

2023 will begin a new chapter in the Innisfail program. We look forward to making sure our genetics remain at the forefront of beef production and ensuring greater profitability for our customers.

efficiency

noun

ef·fi·cien·cy i-'fi-shən-sē

plural **efficiencies**

1

: the quality or degree of being **efficient**

2

a

: **efficient** operation

b

(1)

: **effective** operation as measured by a comparison of production with cost (as in energy, time, and money)

Let us know if you need help with travel arrangements.
We would be glad to pick you up in Augusta or Louisville.

We are selling full possession and 2/3 semen interest in
every bull unless otherwise stated.

We are retaining 2 flushes min 6 eggs per flush on all
females sold at our expense and buyers' convenience.

TERMS AND CONDITIONS

TERMS: Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchasers during or immediately after the sale and will not be released until settlement has been made. Each animal will be at the purchaser's risk immediately after the animal is sold.

REGISTRATION CERTIFICATES: Registration certificates of the animals will be transferred to the buyer at the seller's expense. All calves born before the sale will be registered by the seller. All calves born after will be registered by the buyer. Each buyer must be sure to give the clerk his proper name and address for making transfers. AI certificates will NOT be furnished by the seller on females carrying the service of non-owned AI sires.

EPDS: The EPDs listed herein are as reported by the AHA and are from April 3, 2023 evaluation. We will not be responsible for changes in EPDs or if these cattle do not perform as indicated by their estimated EPDs.

HEALTH: All cattle selling will have interstate health charts required for shipping into other sections of the U.S. All females who are old enough are officially calfhood vaccinated.

LIABILITY: All persons who attend the sale do so at their own risk, and the owners and sale manager assume no liability, legal or otherwise, for any accidents which may occur. Stith Auction Service acts only as agents for the seller and have no responsibilities other than those involved in conducting the sale.

BREEDING GUARANTEE: Animals sold in this sale are guaranteed by the owners to be breeders, provided they are properly handled and cared for by the purchaser. If any fails to breed, the seller must be notified by Jan. 1, 2023 and for open heifers by July 1, 2023, otherwise the animal is no longer guaranteed in any way. If animal is in sound, healthy condition, buyer may return it to seller, who shall have six months to test it and then, if the animal proves to be a non-breeder, a satisfactory exchange will be made or purchase price refunded. Every known blemish will be called before the animal is sold and no animal will knowingly be sold that is not sound in any way. Any changes in breeding dates will be announced sale day. Any female selling with calf at side is considered to be a breeder with no further guarantee in this regard.

ANNOUNCEMENTS: Announcements at the sale ring by the owners or the auctioneer concerning the cattle will take precedence over statements in the sale catalog.

INSURANCE: Insurance will be available.

TRUCKING: Trucking will be available.

MAIL OR PHONE BIDS: Mail or phone order bids may be handled by the owners or any of the sale staff.
